Australian Equine Dental Practice

Certificate of Equine Dentistry Training Information Course 2021-a for Non-vets and Vets

This is a brief overview of the Diploma of Equine Dentistry course provided by the Australian Equine Dental Practice (AEDP). Refer to the course terms and conditions document for full information.

Qualification	AEDP Certificate of Equine Dentistry
Dates & Duration (non-Vet)	Distance education part 1 from 1 Feb 2021 to 9 Apr 2021 Practical education part 1 from 12 Apr to 7 May 2021
Dates & Duration (Vet)	Distance education part 1 from 1 Feb 2021 to 9 Apr 2021 Practical education part 1 from 19 Apr to 30 Apr 2021
Delivery	By distance education with practicals based in Melbourne Australia. We may be able to adjust the dates for overseas participants.
Course Objectives	To provide routine and advanced care of the equine dentition and the oral cavity; to provide assessment, treatment and post-treatment care, having due regard for the integrity of natural dental structures and for the overall health of the patient.
Course Model	Distance education is alternated with on site education to develop theoretical grounding and practical aptitude in a stimulating format. Regular learning assessment aims to encourage the building of knowledge which is applied with the aim of practical proficiency.
Admission Prerequisites	Participants are required to have one or more of the following: <ul style="list-style-type: none"> • Secondary education with post-secondary education or significant horse experience • Tertiary education and appropriate horse experience • Mature age skills, however do not meet the educational requirements but can demonstrate considerable horse experience and appropriate learning aptitude.
Fees	Training fees total \$16,000. Application fee \$220. Payments are due in stages as outlined in clause 17 of the Terms and Conditions document. Finance options are available. The training fees also include twelve months consultation support for you in your own practice, text books, charts and specimens for practicals.
Applications	Application forms are available on request and applications must be accompanied by the non-refundable application fee. Applications close 25 January 2021.
Equipment Required	A complete set of equipment of a quality which meets or exceeds the specification of the standard AEDP instrument set. The 2020 completely redesigned AEDP instruments set can be ordered at a cost of \$8,600 incl. 10% GST. (GST exempt for export)
Accommodation	Full board at our premises in Melbourne for the duration of the practical stages can be provided for additional cost.

Other Things to Consider

If you are reading this, it is clear that you care about horses and that equine dentistry is something you are very interested in. Training as an equine dentist and being active in equine dentistry can allow you to contribute greatly to the health and well-being of horses. Before taking the next step, it is essential to consider a few aspects first.

Course Core Values

This private course aims to make you proficient in routine dental and related health care for horses. You will be expected to do so according to the [Code of Conduct](#) of the NEDP, a professional association which aims to set standards of integrity for equine dentists.

Professional Status

Once qualified, you can choose to work independently, as member of a veterinary practice or alongside colleagues in an established equine dental practice.

Your Background

Consider not just whether you meet the educational prerequisites, but whether you are likely to be successful in completing the course. We can suggest some reading material to help you get a taste of it. Alternatively, there is the option to join us for a short familiarisation day.

The Equine Marketplace

No matter how good your equine dentistry skills are at the completion of the course, success comes from you creating your position within the industry. Before you apply, it is suggested you prepare a basic business plan with your advisers to determine if you are likely to reach your goal.

Your Commitment

The material you are required to learn is challenging and requires significant effort from you. If you are confident and familiar with study methods, you may elect to work part-time alongside your theory study to have a diversion.

Curriculum

The AEDP offers one Certificate Equine Dentistry course every year in Australia. It comprises theory lectures comprising 50 study days and 20 days practical training.

General Proficiencies

The course aims to ensure successful participants have the following general proficiencies:

- Engage in appropriate collaboration with, and referral to, veterinary and para-veterinary professionals.
- Achieve high standards in the running of an equine dental practice.
- Provide horse owners with advice regarding oral health, responsible dental care, good riding or driving techniques and sound nutritional management.
- Provide treatment which respects natural structures allowing improved function of the dental and digestive systems.
- Be able to competently refer complex dental procedures to Diploma qualified colleagues.

Treatment Competencies

Treatment competencies for all cases:

- Routine filing without mechanical restraints or

routine sedation.

- Identifying and preventing low-level disease of periodontal structures.
- Removing small teeth and wolf teeth.
- Removing deciduous incisors and pre-molar caps when indicated.
- Assessing and referring incisor and molar extractions according to protocols.
- Treating minor lacerations of lips and cheeks.
- Providing riders and drivers with bit and tack advice.
- Advising client on feeding methods and nutrition.
- Providing reports and referrals to equine dentists and veterinarians as appropriate.

Complex Case Competencies

Limited to competently documenting and referring complex cases to Diploma trained colleagues or veterinarians.

Equipment Proficiencies

Equipment proficiencies include the application of:

- Dental speculum
- Manually operated dental files
- Dental and periodontal probes and other devices
- Small surgical instruments
- Extraction forceps
